

# Paperless meeting solutions with mobile device

Eric Lin (Chuan-Lang Lin), CEO of HAMASTAR Technology Co., Ltd.

## Abstract

Paperless meeting or conference has been in business for years, the traditional ICT infrastructure for holding a paperless meeting was using hardware technology to synchronize the participant's screen and information.

Since the smart device are more popular and the internet bandwidth also more faster, now we could hold a paperless meeting or conference with various smart device, including iPad, iPhone, Android Pad, Android Phone, Windows8 device, PC,NB and other smart devices.

The Executive Yuan(行政院), the Executive Branch of the Taiwanese Government which is the highest level of administrative organization in Taiwan, now using paperless meeting solutions during the weekly meeting. The Legislative Branch(The Legislative Yuan,立法院), The Supervision Branch (The Control Yuan 監察院) and The Judicial Branch(The Judicial Yuan,司法院) also adopted the paperless meeting mechanic for saving meeting papers and to provide on-line meeting with smart device for more efficiency issue.

The presentation will give an overview of the paperless meeting solutions with mobile devices and share the successful case on government.
